ONE CLICK SERVICES

Passport NFC
With Liveness & Likeness

One Click Services (OCS) is a ready-to-use identity verification app suitable for online use cases. Delivered as a simple API, the process can be linked to your own processes and website.

Using trusted cloud infrastructure, the API is scalable and secure, providing instant results without the storing of personal data.

One Click Services provides a reliable and user-friendly method for biographical and biometrical user verification with easy business integration.

BUSINESS

Registration

Business requests URL/token passing in their client's reference ID.

Single-use-timed deeplink URL/token generated from OCS.

OCS sends URL/token to Business via API. Business sends URL/token to client. Client follows link to platform store & installs app if required.

Business can generate QR code from URL
